

Morning Works at Keeneland

One of the most magical ways to experience Keeneland is by watching morning works. Keeneland's main track is open to horses and trainers 7 days a week from 5:30 – 10 a.m. (weather permitting). Come out and enjoy the Kentucky sunrise while watching some of the state's most incredible athletes get their morning workout in. Afterwards, be sure to stop by the track kitchen for breakfast!

Meet the NEIGHbors

Meet the NEIGHbors returns to Horse Country on June 15 and 16! The members of Horse Country will open their gates for two days of special free tours to Central Kentucky residents as part of the "Meet the NEIGHbors" event, allowing locals to be tourists in their own back yard. Tickets are required and availability is limited, so book your complimentary tour today!

Crafts with the Lexington Children's Museum

The activity card features a background of soft-serve ice cream. On the left, there are illustrations of a measuring cup, a red oven mitt, and a green oven mitt. On the right, a cartoon girl with pigtails, wearing a yellow floral dress and a yellow hat, is holding an ice cream cone. The title 'DIY ICE CREAM IN A BAG' is written in large, colorful letters. Below the title, there are four numbered instructions, a 'Materials' list, and a 'The Science' section. The Lexington Children's Museum logo is in the bottom right corner.

DIY ICE CREAM IN A BAG

Materials

- Measuring Spoons
- Measuring Cup
- Sugar
- Half-and-half
- Vanilla extract
- Salt
- Ice cubes
- Small, sealable bags, such as pint-sized or sandwich-sized
- Gallon-sized sealable bags
- Oven mitts
- Timer

Instructions

1. In a small sealable bag, place one tablespoon of sugar, ½ cup of half-and-half, and ¼ teaspoon of vanilla extract. Seal the bag well.
2. Add four cups of ice cubes to one of the large, gallon-sized bags. Then add ½ cup of salt to the bag.
3. Put the small bag you prepared into the large bag with the ice cubes. Be sure both bags are sealed shut.
4. Put on oven mitts or wrap the bag in a small towel and then shake the bag for five minutes. Feel the smaller bag every couple of minutes while you shake it, and take a peek at it.

The Science

The salt allows the ice and salt mixture to get colder than pure water ice. This extra-cold mixture of salt and ice is able to freeze the ingredients in the bags you used in this activity and turn them into ice cream. While pure water freezes at 0 degrees Celsius (32 degrees Fahrenheit), water mixed with salt will freeze below 0 degrees Celsius.
